**EXACTA DENTAL DIRECT**

# FRESH Bold VPS Impression Material

Are you looking for an impression material that's trustworthy, easy to use, and available at a reasonable cost? Dr. Pete Spalitto said it's hard to find those 3 qualities in one dental product, yet he found exactly that when he discovered EXACTA Dental Direct's FRESH Bold VPS Impression Material. "I've used FRESH Bold for over 16 years because it's reliable, easy, and comes at a fair cost. The accuracy of the product is right up there with the other VPS materials out there," Dr. Spalitto noted.

**A Viscosity for Every Procedure**

Featuring EXACTA's state-of-the-art silicone polymer formula, FRESH Bold Impression Material creates accurate impressions even in the most difficult oral environments. With 9 different viscosities, clinicians can choose which formula will work best for each procedure and technique, including impressions for traditional crown and bridge, dentures, or orthodontic procedures. Some viscosities also have 2 different

set times, regular and fast set, and are dispensed in 50-mL cartridges with automix tips.

**High Quality, Low Cost**

With top-quality products, excellent customer support, and a 100% customer satisfaction guarantee called the EXACTA Promise, EXACTA Dental Direct has proved that the "low cost equals low quality" stereotype is entirely inaccurate. Thousands of dentists, including Dr. Jonathan Koren, rely on FRESH Bold and other EXACTA products for successful, reliable dental outcomes.

"I use many EXACTA products and like them all," Dr. Koren conveyed. "FRESH Bold was the first and only VPS impression material I have used since my residency. It has a nice working time and setting time, and it's priced well in its class." He said the medium body and putty blend well together with no creases, and added, "I use it for all of my Invisalign impressions."

Recommending that other dentists give FRESH Bold a try, Dr. Spalitto concluded, "My assistants trust it as much as I do, and I haven't had my lab tell me otherwise." Dentists who rely on FRESH Bold VPS Impression Material are not only getting great impressions, but they're getting it at a lower cost, which is a win-win for any dental practice.
