# EXACTA Temp Xtra

*An affordable, easy-to-use temporary crown and bridge material that produces highly esthetic and extremely durable provisionals*

**C**reating provisional restorations might not be an exact science, but if you ask Dr. Richard Creaghe, EXACTA Temp Xtra temporary crown and bridge material is exactly what he needs to create predictable, esthetic, and durable temporary restorations that are "head and shoulders above those of any competitor's product."

Calling EXACTA Temp Xtra "the best temporary material on the market," Dr. Creaghe said this "superior product" exceeds his expectations in every way and offers a plethora of benefits to his practice. Beginning with its low cost and ending with its no-need-to-polish esthetics and extreme durability, EXACTA Temp Xtra is the only provisional material he needs for single crowns, multi-unit bridges, and everything in between.

## Ease of Use and Time Savings

So what's so great about EXACTA Temp Xtra? Aren't all temporary materials the same? Nope, not if you ask Dr. Creaghe. In fact, he's so impressed with this material that he can't think of a single necessary improvement and selected just about every feature as a favorite, including ease of use, time savings, esthetics, resilience, and affordability.

From the ease of extruding the material from the cartridge to removing the impression from the mouth, Dr. Creaghe says EXACTA Temp Xtra is easy to use. "The working and setting times are ideal, and it's easy to trim," he said. "After removing the impression tray from the mouth, this material does not have a slimy uncured layer of material to wipe off, which saves time compared to using other provisional materials," he added.

Richard Creaghe, DDS

**"EXACTA Temp Xtra produces durable temporary restorations that are head and shoulders above those of any competitor's product."**

## Esthetics and Durability

With a high gloss enamel-like finish that creates esthetically pleasing provisionals, EXACTA Temp Xtra is available in 7 shades—A1, A2, A3, A3.5, B1, BL, and C2. Praising the natural-looking esthetics of his temporaries, Dr. Creaghe noted, "The esthetics of EXACTA Temp Xtra are excellent because you don't have to polish the restoration. It looks great right out of the impression."

While other provisional materials become brittle and break easily, EXACTA Temp Xtra "is an absolutely a durable, resilient, top-of-the-line superior product," shared Dr. Creaghe, who added, "There is no downside to using it."

## An Affordable Option

Compared to the big-name brands of temporary materials, Dr. Creaghe said EXACTA Temp Xtra is a very affordable solution. Guessing that its cost is about two-thirds of a top-selling brand provisional material, he said, "The competi-

tive price of EXACTA Temp Xtra is a huge benefit and is a great factor in why it's attractive to me."

Concluding that he has "never had the urge to switch away from EXACTA Temp Xtra," Dr. Creaghe explained, "If you have a product that works, you don't change horses in the middle of the stream, you keep using it. Nothing has come along that's equal to EXACTA Temp Xtra."
