Why

EXACTA Dental was founded with a single purpose - to provide value to our customers.

Our products have been carefully designed or selected to provide you with outstanding performance and results. We maintain a direct relationship with you so that we can become familiar with your products, techniques, and preferences, so that ultimately we can serve you better.

Impressions

Composites

Provisional - beauty

When patients leave your office, you want them to look terrific whether they are wearing provisionals or final restorations. Our products will provide the aesthetics your patients want with the ease of use and cost savings that you deserve.

Restorative - strength

From core build up to fiber posts and our cements, great care has been taken to design products that not only benefit you, but your patients as well. We have combined technology and clinical experience to produce products that will surpass your expectations.

Impressions - accuracy

Find out how our nine viscosities of impression material can provide you with the flexibility for your technique while providing incredible accuracy for your lab. Impression material competitors can be gimmicky, but when you just want a material to work reliably, FRESH Bold Impression Material is your answer.

Composites - technology

There are many choices of composite in the dental market. Take a moment to review Nanoceram; a composite line that doesn't make you compromise. Using the latest technology, proven by independent research, we are able to offer you superior aesthetics, handling, longevity, and value.

EXACTA Temp XTRA

This is our best selling product! Our state of the art bis-acrylic material is available in 7 shades with a fast setting time of 1:20. Not only will you get life-like aesthetics but you can add EXACTA Temp to itself for repairs. Each kit contains 1 82g cartridge and 10 mixing tips.

EXACTA Cement XTRA

Zinc-oxide, non-eugenol formula will provide just the right amount of retention for your provisionals. Our formula will not discolor over time, gels nicely for cleanup, and removes cleanly from the prep. Available in an 11g handheld syringe or a 120g cartridge for dispensing guns.

EXACTA Flow Ic

For provisional repairs or general flowable composite needs, look no further than EXACTA Flow. It is shade matched perfectly to EXACTA Temp, so your repairs will be quick and easy. Cures in as little as 3 seconds.

FRESH BOLD VPS Impression Material

The single most important characteristic of an impression material is accuracy. The best test of that is how your crowns fit when seated; the rest is just marketing.

Big brands are now charging over - \$30 per cartridge with wild claims and citing 'study' after 'study'. The bottom line is if you want accurate impressions at a great price, FRESH BOLD VPS is for you.

Plan an upcoming case with FRESH Bold Impression Material and decide for yourself if paying twice as much for a brand name is worth it.

Final Impressions

FRESH BOLD VPS Impression Material provides you with the right materials for your method and provides accurate results consistently. With nine different viscosities to choose from, FRESH BOLD will help you capture the details you need to lead to a great restorations

Pre-Op Impressions

Why mess with alginate? Fresh BOLD Pre-Op Gel is a perfect material for a provisional matrix, bleaching trays, study models and other impression needs. This is a great alternative to alginate and is handy to have in emergency kits so you don't waste time mixing.

Bite Registrations

Whether you are looking for a traditional fluffy and quick bite registration, or rock-solid hardness, we have the choices for you. FRESH BOLD Bite Registration is our most popular and available in a 30 second or 2 minute version. Blu-Max has a rigid 93 Shore A hardness with a 60 second set time.

EXACTA Trays

"Rated excellent or good & purchase recommended by 100% of Evaluators"

These words changed our company. EXACTA Trays were our first product and once they were rated by the leading product evaluation organization, our credibility was established. The trays have simple yet functional design features: wide occlusal plane, rigid nylon-composite body, and each tray is individually wrapped.

Available in: Posterior (50), Anterior (36), Quadrant (40) , Full Arch (30), and Posterior Sideless (50).
Also available in an assorted box.

EXACTA Core-mft

A stable foundation is key to successful building. Your restorations will have just that. EXACTA Core-mft contains micro-fiber technology that provides great strength and physical characteristics of dentin. Dentists often remark on how cutting EXACTA Core-mft feels just like dentin. Fluoride will help eliminate secondary carries and the material is very radiopaque to aid in diagnosis. Available in four shades: A2, Blue, White, and Gold and two dispensing systems.

Cartridge Kit: 1 x 25ml cartridge and 25 mixing tips & IO tips

Nanoceram Composite System

Sometimes you have to search high and low to find a gem. In this case, we found it in Greece. Nanoceram is manufactured by DMP Dental, a 27 year old company, and has been sold worldwide for years, but never had a distributor in the United States. Now, Nanoceram Universal, Flowable, and Posterior are available from EXACTA Dental Direct. This is truly a world-class material.

Often overlooked in the composite debate are two key factors - water sorbtion and solubility. The Dental Advisor did a research report on the subject and we were thrilled with the results. Nanoceram had lower sorbtion and solubility rates than many other well known brands. This means better and longer lasting restorations.

Beyond the science, this composite offer a beautiful result and maintains its glossy finish longer. Not too sticky, it is easily placed and sculpted and polishes quickly. Available in over 20 shades and in syringes or unit doses, Nanoceram is truly a practice changer.

Universal

Unit Dose: 20 x .25g

Syringe: 1 x 4g -

Flowable

Syringe: 2 x 2ml -

Posterior

Unit Dose: 20 x .25g

Syringe: 1 x 4ml

Dispensing Guns

We offer three kinds of dispensing guns. The first is a 1:1 ratio, 50ml dispenser for impression materials and other 50ml cartridges. The second is a 4:1 ratio, 50ml dispenser for EXACTA Temp Xtra. Last, is a 1:1 ratio, 25ml dispenser for EXACTA Core cartridges. Our dispensing guns will work with other brands. Don't spend twice as much through a dealer!

Mixing Tips

We only distribute the authentic Sulzer-Mixpac dispensing system and carry a variety of different tips. Remember that mixing tips are universal and you don't need to buy the exact same tip for more from anywhere else.

Dispensing Gun Holder

If you want to cut down on chairside time, get all your guns in a row prior to the procedure. We also include a tip caddy that fits in the holder for even more organization.

Dispensing gun holder: \$63.95
